### October is Family History Month

Finishing our 120th Year with a Bang, October events include a great lineup that are open for registration.

We will hold our **member meeting** on the second Saturday.

Lisa Gorrell will be expanding her [Intermediate Series](#) with a Part II which will cover tax, military, newspapers, cemeteries and principles of research writing. This will be Wednesday evenings at the FamilySearch Library.

A new topic, [Finding Your Ancestral Home](#) will be presented on Oct 27, by Kate Black.

And on the same day, Bill O'Neil will offer his always popular [Book Repair Workshop](#).

### Japanese American Pilgrimage - Saturday October 13

The California Genealogical Society is partnering with the [Nichi Bei Foundation](#) to host the Nikkei Pilgrimage to Angel Island on October 13. [Tickets are available](#) online for this fun cultural event. Attendees can visit the barracks where immigrants were detained and meet with genealogists to learn how to research their family history. [Judy Sakaki](#), president of Sonoma State University, will present the keynote address.

If you would like to participate as a genealogy consultant, please contact [Linda Okazaki](#). Lunch will be provided.

Beginning on September 15, and continuing through to October 15, we recognize [National Hispanic Heritage Month](#). During the four weeks, celebrations honor the heritage and contributions made by members of the Hispanic community. Festivities begin on September 15, marking the anniversary of independence for the Latin American countries Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua. With great fanfare, celebrations sweep across Latin America, Central American and on into Mexico and Chile commemorating each country's independence from week to week!

This is a good month to learn about Latin American and Hispanic genealogical resources.

### [Excel for Genealogists](#)

**\*\* DATE CHANGED \*\***

Stewart loves spreadsheets! He is an expert in Microsoft Excel using spreadsheets in genealogy quite frequently. Laying out all the data in Excel can help researchers see gaps in knowledge or correlations between data points. Breakthroughs can easily happen by visualizing data in spreadsheets. Stewart shows many examples of his use of spreadsheets to track newspaper clippings, a vital records catalog, tracking ancestor addresses over time, and tracking whole families over many censuses. Stewart will teach how to use Excel filter, sorting, color coding, calculations and many other functions.

Saturday, **Dec 8**, from 1 to 4 p.m.

Also [visit our Eventbrite profile page](#) to see the latest class additions and descriptions.
